Presentation

In the year 2023 we will celebrate the 10th anniversary of the foundation of the IWA by Professor Zeljko Loparic. The International Winnicott Association (IWA) is a worldwide academic civil entity, whose purpose is to publicize, promote and continue Winnicott's legacy. This legacy is compounded by his extraordinary original work and also by his appeal to scholars of his work to continue the revolution he started in psychoanalysis.

In these ten years, with the participation of affiliated groups from different countries – Argentina, Belgium, Brazil, China, England, France, Greece, Israel, Italy and Portugal – the IWA held four International Congresses, in which several Winnicottian theses were presented and debated.

The Fifth International Winnicott Association Congress will be held in São Paulo, Brazil, from the 14th to the 18th of June 2023. This biennial Congress is sponsored and funded by the IWA and the Brazilian Institute of Winnicottian Psychoanalysis (IBPW), which will organize the meeting.

The general theme of the 5th Congress is: Aggression and the Maturation Processes.

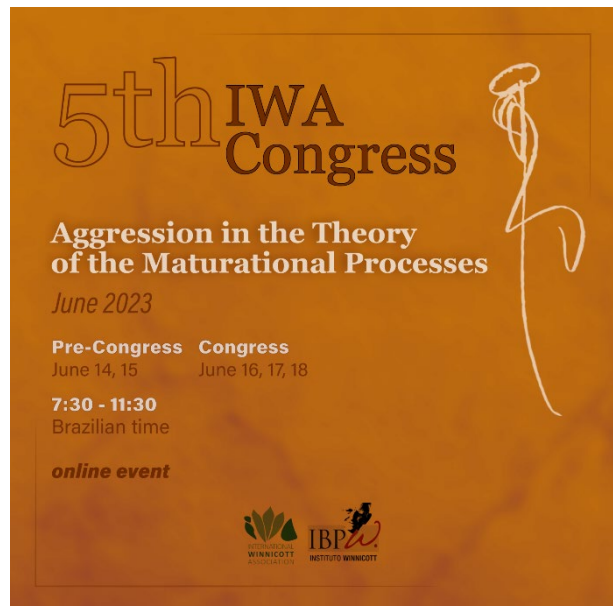

The main objective of this Congress is to explore the new theory of aggression proposed by Winnicott, which is one of the pillars of his paradigm shift. For him, aggression, like all other human dimensions, needs to be experienced throughout maturational processes, in the presence of a good enough environment, in order to be integrated into the self, otherwise it will remain dissociated, complicating the life of the individual and the life in society.
